// INTRO

„Chasing the Light“

Light is fundamental to Sebastian Donath's work. In his images, he captures light deliberately in every moment. His photography goes beyond the visible – it tells stories, evokes memories, and stirs emotions.

His curiosity and playful spirit are reflected in his work, which finds the extraordinary in the everyday. With technical expertise, a keen eye for detail, and a deep understanding of brands and people, he brings every subject to life in a compelling way.

At the heart of his work – and in front of his lens – are people, objects, and spaces in all their diversity: Minimalist and high in contrast, yet always with a sense of playfulness.

Whether in the studio or outdoors, in product, portrait, or lifestyle photography, he adapts both technique and setup flexibly to meet the unique needs of each project. Sebastian Donath masters the art of lighting – working with natural light, artificial light, or flash with precision and creativity.

His calm, professional manner fosters a working environment that minimizes stress and ensures the best possible results. With empathy and sensitivity, he makes sure every person in front of his camera feels comfortable. He is supported by an experienced network of stylists, set designers, and assistants.

With a professional background in carpentry and product design, Sebastian combines creative instinct with craftsmanship. He has many years of experience working with international clients and large teams.
