„Chasing the Light“

Light is a central element in the work of Sebastian Donath. In his images, he deliberately captures light in every moment. His photography goes beyond the visible – it tells stories, evokes memories, and stirs emotions.

His curiosity and playful approach are reflected in his work, which find the extraordinary in the everyday. With technical expertise, a keen eye for detail, and a deep understanding of brands and people, he brings every subject to life in a compelling way.

For Sebastian Donath, perfection is not the ultimate goal – what matters more is the emotional connection between the experience and the imagination. This connection is reflected in his images, where intentional „flaws“ become an integral part of his creative process and philosophy. These „imperfections“ enhance the authenticity and depth of his photography. At the heart of his work and in front of his lens are people, objects, and spaces in all their diversity: minimalist and high in contrast, but always with a touch of playfulness.

Whether in the studio or outdoors, in product, portrait, or lifestyle photography, he adapts both technique and setup flexibly to meet the unique needs of each project. Sebastian Donath masters the art of lighting – working with natural light, artificial light, or flash with precision and creativity.

His calm, professional manner fosters a work environment that minimizes stress and ensures the best possible results. With empathy and sensitivity, he makes sure every person in front of his camera feels comfortable. He is supported by an experienced network of stylists, set designers, and assistants.

With a professional background in product design, Sebastian combines creative instinct with craftsmanship. He has many years of experience working with international clients and large teams.
